

# Vs zero

Setting the highest standards for today's earth-friendly environments.

- 100% VOC Free
- Contains No Petroleum Solvent
- Effortless Trouble-free Printing
- High Print Contrast
- GraCol 7 and DIN ISO 2846-1 Compliant

Printers today are being challenged to answer the demand for environmental responsibility—from eliminating chemicals, to printing on recycled papers, to reducing consumption. Now, when it comes to ink, Van Son can take your green initiatives to the next level.

**Introducing Van Son's Vs Zero.** Made of 100% vegetable oil, this high-intensity ink is suitable for straight printing as well as perfecting presses, and complies with GraCol 7 and DIN ISO 2846-1 standards. Additionally, this totally earth-friendly ink provides effortless, trouble-free printing, producing brighter colors and greater print contrast. Include environmental sustainability in every step of your printing operation with Van Son's VS Zero and send a powerful message to your customers that you are serious about your company's footprint.
